

Briar Rose Field Archers

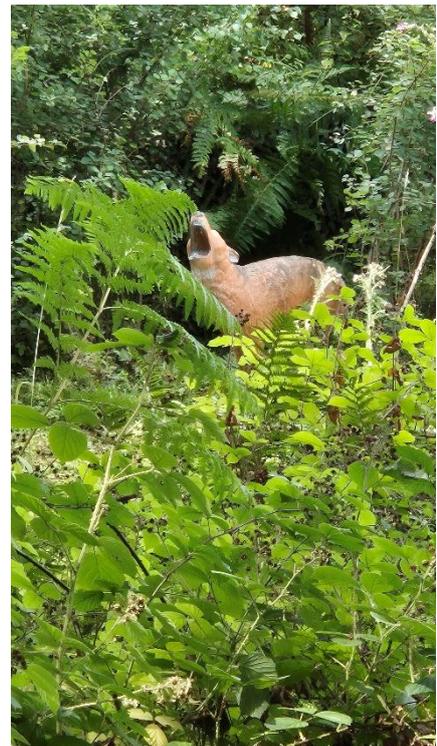

On the 27th of July, Briar Rose welcomed 106 archers to our club wood. This would be the most archers we have ever had grace our shoots. It would also see our club catering team be kept very busy.

This year we had decided to run our own catering rather than relying on outside caterers. This was a huge undertaking for us, but feedback on the menu, quality and quantity of food has been very positive. We did have a huge selection of cakes that seemed to go down well with those attending.

We didn't get it all right though and have seen a couple of areas where we can improve, like moving the hot water urn and reworking some of the longer shots, where there were delays through the day.

For those interested the hippopotamus target was 66 yards from the wasp peg and 53 from the red. Yes, we had wasp pegs for all 36 targets.

We appreciated all the feedback on the course and were delighted that our choice of mesh target faces proved positive, especially the tiger and 2 standing bears of differing sizes, which caught some out.

By the way, the small bear was 30 yards from Wasp.

We hope next year to welcome you all again and continue to develop and continue to offer a fun while still challenging course.

Thank you all for coming and supporting our small club.
