Woodsman Round - amendment

C. **The exact words of your proposal.**

d) The first shooting member of the group may use binoculars after their arrows have been shot to verify if a kill has been made by themselves. This person then acts as a spotter for the remaining shooters to verify if a kill has been made.

D. **Please identify the benefits of the new proposal (maximum 100 words).**

This is a slight amendment to the Woodsman Round to speed up the round by reducing the number of shots an archer may need to take. This means the first archer may shoot two additional arrows unnecessarily but that is better than everyone taking three arrows and the first archers kill would be verified at time of scoring. This is a change to the Suggested Round rules only by including a scoring spotter and therefore has so has no adverse impact on Safety, Shooting Rules and any insurance currently purchased by NFAS.
